Welcome to learning with AICT

Who are we?

The Australian Institute of Commerce and Technology (AICT) is a private RTO offering quality Business, and Information Technology training throughout secondary and tertiary level education.

We specialise in providing real world education to our students, so they are prepared for the workplace environment whilst understanding the fundamental theories and knowledge within each learning criteria.

Additionally we incorporate a hands-on practical approach to all of our learning material to ensure it is as tangible and as interesting as possible, keeping our students engaged in the content.

Established in 1988 we have over 25 years of experience within our field, where we have created a large network of connections and partners. This has enabled us to establish work experience opportunities for our tertiary students to utilise, so they can finish their studies with a job ready skillset: knowledge, soft skills, and real workplace experience.

Chief Executive Officer

AICT in your School

So now you may be wondering, why is AICT at my school? We are in your high school because we have an innovative and effective style of teaching.

Rather than adding weight to your school bag with text books which weigh a tonne, we have placed everything needed to learn onto an online portal.

The use of interactive online content, and clustered competencies means students can learn more, and enjoy learning too, and if you’re wondering how much work has been completed, you can check via the progress bar available inside every student’s profile.

VETiS Journey

AICT began providing AUSPICING in 2012 in the traditional method of pen and paper. We soon discovered teachers, and students alike were having issues with this method whether it be too many books to carry, or massive amounts of paperwork to complete.

Working closely with Education Training and Industry Liaison Officers Kristin Reddin and Faye Jones, we developed our online portal to ensure the portal met the needs of both the students and teachers.

Studying with AICT

High School Certifications

Our High School AUSPICING program has a Business and Information Technology focus. Using our online portal, students are able to access their studies any time, anywhere, as long as they have a working internet connection.

Additionally, students are able to keep track of their progress through our easy-to-navigate progress bar. This allows both the student and teacher to set goals of completion throughout the year, whilst knowing how much work they have left to complete.

Information Technology (In schools)

- Certificate I in Information Digital Media Technology
- Certificate II in Information Digital Media Technology
- Certificate III in Information Digital Media Technology

Business (In schools)

- Certificate I in Business
- Certificate II in Business
- Certificate III in Business

USI

The USI is a Unique Student Identifier as required by the government as of 2015. The USI allows students to login to www.USI.gov.au and keep track of the qualifications they have acquired. Meaning no more worries about losing their paper certification.

Credit Transfer

Credit Transfers allow students to swap their studies without the hassle of repeating a unit. If your child has been studying a different certificate, we can evaluate their completed units to ensure they complete only the necessary units.

RPL

The Recognition of Prior Learning allows for units to be credited based upon previously attained certificates or through work-based experience. The RPL process is lengthy and costs $250 per unit, and doesn't guarantee credit of every unit.
Tertiary Qualifications

Pathways to Success

Tertiary Pathways

Additionally on campus at AICT, we offer tertiary study options for students who want to continue studying IT or Business.

Every course is hands-on practical learning, and provide the option to gain industry certifications from Microsoft, CompTIA etc. and work experience through our Internship program.

Students can choose to study to gain university entrance, or to fast-track into a career. No matter which pathway they choose, they will be offered job assistance for up to 5 months after graduation.

Flexible Study Options

Choose a time table to choose suit your lifestyle.

- Information Technology Pathway 18 months
- Business Pathway 18 months
- Cert IV in IT Networking
- Cert IV in Business
- Diploma of IT Networking & Server Administrator
- Diploma of Business & Advanced Diploma of Business
- University / Job
- University / Job

The AICT Difference

So what makes AICT different to every other education provider? Simple! We are a Microsoft Network Partner which has enabled us to provide industry standard training for our students, preparing them for the workplace.

We provide hands-on practical certification training, where students are taught by applying the theory on industry software and hardware, along with soft skills training to ensure students can apply their learning and demonstrate their skills in their resume, in their job interviews, and during their communications with clients and co-workers.

Nationally Recognised Training

Additionally, we provide our students the opportunity to achieve and attain their industry based certifications, such as their MCSA Windows 8.1, and CompTIA A+; then follow them up with Work Experience by providing chances to work with one of our companies partners, where they will leave with 4 weeks on-the-job experience and a written reference to use as a future employment tool.

CURTIN ARTICULATION

Our Diploma in IT results in articulation into second year IT degree’s at Curtin University

Curtin University
James Taylor
Former AICT Student
Facebook 2014  www.facebook.com/CertifiedHero

“5 Stars! These guys got me started in my I.T career. Their courses are amazing and very detailed. Worth the monies spent. Now I am 3 years into my I.T career and looking forward to new and exciting roles.”

THE KEY TO SUCCESS...

» Practical hands-on learning with engaging content
» Work place relevant content made fun
» 24/7 access over the internet
